World Class Print Finishing Advice & Product Updates

THE BLUE SAMPLE TEST CHALLENGE

By now you should have noticed a blue A4 card enclosed with your newsletter, it is not just any card, in fact it took us a while to find such a "prone to cracking" piece of CROSS GRAINED material (FOLD IT IN HALF AND SEE FOR YOURSELF). We use this material to demonstrate some of our latest devices at exhibitions.

I challenge you to scrutinise the sample and tell us which short edge was guillotine cut and which short edge was slit using our edge-trimming option from the sensational Multi-tool (we have even left the trimmed edge inside, if you can find it?)

CALL PAUL WITH CORRECT ANSWER TO RECEIVE ONE PACKET OF FREE CREASING INSERTS

You have a 50% chance of winning unless its blatantly obvious of course?

The material also highlights a number of other Tech-ni-fold applications such as close-proximity micro-perforating, Easy-fit creasing and kiss-cutting.

AMAZING 10% DISCOUNT OFFER

Simply take this blue card to the Bristol Open-house event and receive an instant **10% DISCOUNT** on **ALL** of the Tech-ni-fold range of products and SEE how it is done!!

It would be great to meet you there for what may be our last chance before next Aprils IPEX exhibition.

SEE REVERSE FOR ALL THE DETAILS

Hi and welcome to September's newsletter, I hope you enjoy reading about some of our latest updates.

In June's newsletter we announced our intention to host an open house event with the focus very much on introducing an array of our latest innovations and demonstrating them to you first hand.

I am excited to announce that due to the support of Duplo International an opportunity has arisen sooner than we had anticipated. We are now able to share Duplo's venue at Gloucestershire CCC for what promises to be a fantastic chance to present an even healthier in-depth look into the future of Print finishing technology. Not only do you benefit from our ideas and creations but also those of another world leader in their field of expertise.

Seeing is believing and my promise stands - I personally guarantee our products will amaze you, see back page for all the details...

New Product Update...The Multi Tool

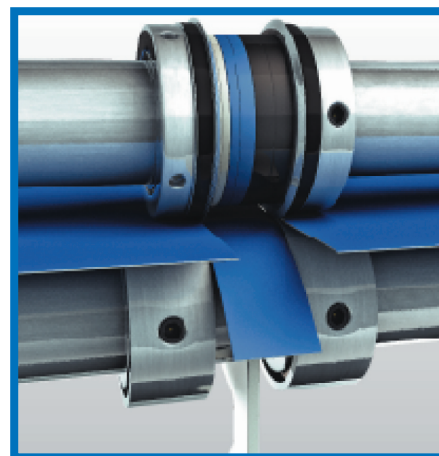

This product is turning out to be even hotter than the Trl-Creaser...so far we've sold out every single pre-production tool and the first production run is gone!

What's it all about?

With the Multi Tool Complete Package you can accomplish the following...all on your folding machine.

- Double Micro Perf setup from as close as 1/4" apart or vary the space up to 1 1/2" apart
- Single Micro Perf setup using micro perf blades from 12 tpi to 72 tpi
- Kiss Cut (Cut Score) setup will cut half way through the sheet
- Slitting setup delivers **Guillotine Quality Cutting** on your folder. Cutting blades **last 5 times as long as OEM blades**
- Double-Cut setup provides guillotine quality trim outs on multiple up work. **Unique Waste Stripper** reduces makeready time and increases average yield by eliminating paper jams
- Edge Trim setup gives you perfectly straight edge trims along with the quality you'd expect from the guillotine cutter

If you don't need the complete package right now and perhaps need only the cutting or the perfining option, simply purchase what you need. You can always add on at a later date.

Double Cut configuration shown above using two Long-Life cutting blades in combination with our **self-sharpening** counter knives.

The view above also shows a peek at the easy to use Waste Stripper. No tools required to mount or adjust...simply slide onto the shaft between the two counter knives.

Currently available only for 25mm and 35mm MBO and Stahl folders

Micro Perforator Owners...New Upgrades Available

If you own a Technifold Micro Perforator for MBO or Stahl 25 or 35mm shafts, you can now add Slitting, Edge Trimming and even Kiss Cutting to your existing Micro Perforator!

Slitting Option

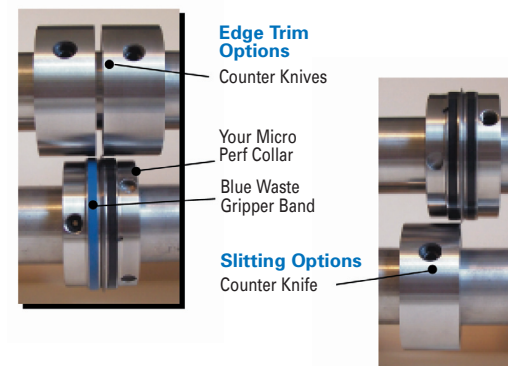

Simple purchase one blade and one Counter Knife and set up as shown in the diagram. Our Special Counter Knives will deliver guillotine quality trims and are designed to be 'self-sharpening'. These 2 sided counter knives provide a clean, scissor type cut and will last at least 5 times as long as traditional OEM devices. This option available for all 3 sizes listed.

Edge Trim Option

Requires purchase of 2 Counter Knives, 1 blade and 1 Blue Waste Gripper Band. One counter knife does the cutting and the other counter knife works along with the blue gripper band to provide a perfectly straight edge trim. This options available for only 35mm MBO/Stahl devices.

Kiss Cut Option

Simply purchase one Kiss Cut blade and set up much as you would a perf job. The difference is that you don't cut into the nylon anvil; adjust the gap to cut halfway through the sheet being run.
