

### Testimonials

"We can't believe how easy it is to set and the productivity gains we are getting in such a short time."

*Maritn Jones, W O Jones (Printers) Limited,  
Llangefni, Anglesea*

"Easy setup, anyone can score with this device. Even the non experienced operator. From all the available devices in the world, this is the best one. It's a big hit in Holland."

*Bert Verhuever - Wifac bv, Mijdrecht, Holland,  
Leading Dutch MBO Folding Machine Agents*

The specially formulated and softer creasing ribs work on the outside of the material, carefully manipulating and stretching the fibres so that cracking problems are avoided, even on coated stock. The Tri-Creaser penetrates the material much deeper than the rigid steel used with other rotary methods, guaranteeing perfect results every time.

The impressive fibre stretch crease produces Cylinder style penetration from the start of the sheet to the end.

### Without the Tri-Creaser

### Tri-Creaser

The revolutionary Tri-Creaser totally eliminates fibre cracking on all popular types of folding machines

### Using the Tri-Creaser

**Fold this flap inward  
and see for yourself**

Now read on to find out  
how it works...
