Why the Tri-Creaser Fast Fit?

It is a simple fact; Your OEM scoring tools were **not** designed to crease single stock materials to prevent book covers, brochures, menus, greetings cards & leaflets from cracking. The abrasive scoring blades create a V-shaped score that is more prone to damaging delicate single stock fibres, this download document explains exactly how...

**THREE REASONS WHY
YOUR FOLDING MACHINE'S OEM SCORING TOOLS
WILL **NEVER** STOP YOUR FOLDED PRODUCTS
FROM CRACKING!**

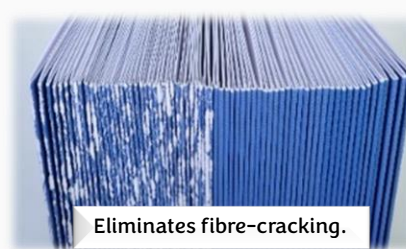

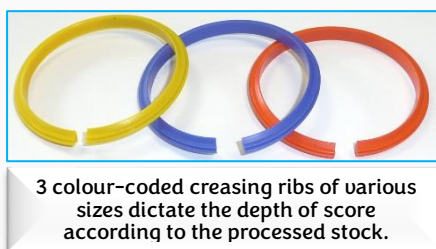

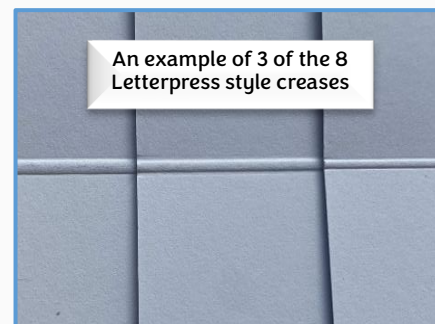

With over 40,000 installations made throughout the world so far, the **Tri-Creaser Fast Fit** has become our best-selling creasing device for folding machines over the last decade. The multiple option (Letterpress style) creasing device slides onto the shafts of your folding machine, replacing your OEM supplied scoring tools to enable high quality creasing and folding in one pass.

As with all the solutions in our Tri-Creaser range, the Fast Fit version utilises our **specially formulated, colour-coded rubber creasing ribs, designed to stretch and manipulate the stock fibres, preventing 65-350 gsm stocks from cracking during the folding stage.**

What makes this version stand out is in how fast and easy it is to insert our modified **split creasing ribs** into the male hub before locking them in place, ready to work their magic.
