

Multi-Tool

Keeping work away from the
GUILLOTINE & CYLINDER

Now it's possible to
**SLIT – TRIM - KISS
CUT - MICRO-
PERFORATE AND
EDGE TRIM**
using one device

Tech-ni-fold Ltd have
produced this world's
first multi – purpose
device to complement
their revolutionary
Tri-creaser.

WORLD FIRST INNOVATIONS
WORLD CLASS ENGINEERING

Close proximity perforation option

Double cutting option

Micro perforation blade options

Multi-Tool

Keeping work away from the
GUILLOTINE & CYLINDER

The multi-tool is unique in two ways

1. The quality of cut and perforation is of a much higher standard than ever witnessed before on other rotary applications

LONG LIFE

cutting blades are made to last up to 5 TIMES longer than the throw away versions that other manufacturers offer

SCISSOR ACTION

The SCISSOR ACTION design ensures that the cutting standard reaches the quality usually witnessed only on paper guillotines

SELF SHARPENING

The uniquely designed double sided and hardened cutting bosses enable the blades to SELF SHARPEN during production, resulting in extended life span, far in advance of other systems.

MICRO-PERFORATION

The FINE and almost INVISIBLE style of the micro-perforation options simulates the LETTERPRESS application. 17tpi, 25tpi and 52tpi (teeth per inch) perforation styles. Also available are the 12tpi & 72tpi blade options.

LONG LASTING

Our double bevelled perforation blades out last all other blades of their kind many times over.

TROUBLE FREE

Edge trimming has never been easier to apply, guaranteeing TROUBLE FREE production from the very outset.

Edge Trim

Double Cut set-up

OPTION 3 - Close Proximity Perforator kit

OPTION 4 - Double Cutting Kit

- Option 1**
Produces single micro perforation
 - Option 2**
Produces high quality single cut
 - Option 3**
Produces two close proximity perforations from as little as 4mm apart.
 - Option 4**
Produces high quality double cutting
 - Option 5**
Produces clean cut edge trimming
 - Option 6**
Produces half cut applications (kiss cut)
- Optional combinations of any of the above applications such as perforate/cut or perforate/edge trim

2. The unit can be purchased in a basic form until you are ready to build on more options

SIMPLE START

Simply start with option 1 or 2 and add on only when you feel the time is right.
