

# Spine & Hinge Creaser

Close proximity creasing solution for Perfect Bound books

The revolutionary Spine & Hinge Creaser was designed to produce up to four close-proximity creases for specialist products such as Perfect Bound book covers and capacity wallets.

1

2

3

4

Simply by arranging a set of red spacers the Spine & Hinge Creaser can be pre-set to accommodate the correct distance required from crease to crease.

Spine & Hinge crease sample. [Please fold here:](#)

Companies are finding the need to produce this type of product in-house and for this reason we recommend that the system is either incorporated into a **Tech-ni-fold developed Automatic or Table-top Creasing machine.**

## Quad-Creaser

For Muller Martini Binding Machines

The Quad-creaser is a similar device to the Spine & Hinge Creaser and fits directly onto the cover feeder of a Muller Martini Binding machine.

The specially designed split creasing ribs allow for a fast change of setting. This modification was implemented to eliminate having to remove the machines shafts.

### Benefits of creasing solutions:

- Eliminates cracking
- Produces Letterpress quality creasing (see crease sample above)
- No ripping or tearing
- Simple to use
- Saves time
- Saves outsourcing costs
