

Multi-Tool

**Now it's possible to
SLIT – TRIM – KISS CUT –
MICRO-PERFORATE AND EDGE TRIM
using one device**

Tech-ni-fold Ltd have produced this world's first multi – purpose device to complement their revolutionary Tri-creaser.

Keeping work away from the guillotine

The Multi-tool has been designed to help keep work away from the guillotine in much the same way as the Tri-creaser eliminates the need to use a letterpress Cylinder.

See over the page for Why is the Multi-tool so special?

Multi-Tool

The multi-tool is unique in two way

- 1 The quality of cut and perforation is of a much higher standard than ever witnessed before on other rotary applications**

LONG LIFE

cutting blades are made to last up to 7 TIMES longer than the throw away versions that other manufacturers offer

SCISSOR ACTION

The SCISSOR ACTION design ensures that the cutting standard reaches the quality usually witnessed only on paper guillotines

SELF SHARPEN

The uniquely designed double sided and hardened cutting bosses enable the blades to SELF SHARPEN during production, resulting in extended life span, far in advance of other systems.

MICRO-PERFORATION

The FINE and almost INVISIBLE style of micro-perforation options simulates the LETTERPRESS style. 17tpi, 25tpi and 52tpi (teeth per inch) perforation styles available

LONG LASTING

Our double bevelled perforation blades out last all other blades of their kind many times over.

TROUBLE FREE

Edge trimming has never been easier to apply, guaranteeing TROUBLE FREE production from the very outset.

- 2 The unit can be purchased in a basic form until you are ready to build on more options**

SIMPLE START

Simply start with option 1 or 2 and add on only when you feel the time is right.

SAVE MONEY

Save money and go for the full package straight away

Option 1

Produces two close proximity perforations from as little as 4mm apart.

Option 2

Produces high quality double cutting

Option 3

Produces high quality single cut

Option 4

Produces clean cut edge trimming

Option 5

Produces half cut application (kiss cut)

Optional combinations of any of the above applications such as perforate/cut or perforate/edge trim
