

INTRODUCING THE REVOLUTIONARY CP - APPLICATOR

The ultimate close proximity **crease** and **perf** applicator
for most popular types of folding machines.

Now it is possible to produce two almost invisible micro-perforations as little as 5mm apart. The impressive CP - Applicator includes creasing options that can easily be inserted into the middle of the two perforations to ensure quality fold position. This new system is perfect for companies looking for faster and more cost-effective ways of producing vouchers, tickets, coupons or rip-out order forms that need tear-off perfs close to the fold.

The CP - Applicator is fully adjustable to allow quick change over of crease/perf combination for any given format
