

CP Applicator

The close proximity creasing and micro-perforating device

Now it is possible to produce two fine and almost invisible micro-perforations as close as 5mm from the crease.

The perfect solution for producing signatures, coupons, tickets or order forms that require tear-off perfs close to the fold. Uses Easy Fit creasing ribs to guarantee accurate folding. You can use 1 Crease + 2 Perf set-up as demonstrated above, or any combination, including single line crease and perfs.

Benefits of the CP Applicator...

- Micro-perforates as close as **5mm** and up to **50mm** apart
- Crease quality **guarantees accurate folding**
- Easy to assemble
- Helps you get your job **delivered on time**
- Not limited by speed and works as fast as your machine can run
- Works perfectly on cross grain materials regardless of solid ink coverage
- Excellent on UV coated, laminated or digital stocks
- Colour-coded creasing ribs available for different grades of stock

Versatile features for the CP Applicator...

- Precision cut 17, 25 & 52 teeth per inch micro-perf blades
- Special cassette that houses creasing ribs
- In-built colour coding system that simplifies setting procedures
- Adaptable set of spacer rings that dictate distances from blade to crease
- Specially designed nylon perfing sleeves that aid precision kiss-cutting tolerances

Our CP Applicator is compatible with the following types of folding and creasing machines:
Heidelberg, Stahl, MBO, Horizon, Herzog & Heymann, GUK, MB, Shoei, Baum, CreaseStream, Agor.
